

EUNGCHAN KANG

SENIOR SOFTWARE ENGINEER

Seoul, Republic of Korea 08735

821028045097

yeschan119@gmail.com

ABOUT ME

Senior Software Engineer with **5+ years** of professional experience in software architecture, AI engineering, and cloud platforms, designing and operating multi-tenant systems.

- Software architecture: layered design separating domain, API, data, and deployment layers
- AI engineering: LLM Agents, MCP, Harness Engineering, Graph Engineering
- Multi-tenant SaaS and AWS-based cloud systems
- Database performance: RDBMS internals, execution plans, and query tuning

Portfolio
yeschan119.com

GitHub
github.com/yeschan119

SKILLS

Language
C, C++, C#
Python, Typescript
SQL, PL/SQL

AI Engineering
LLM Agents, MCP,
Harness Engineering,
Graph Engineering

Database
Oracle, MySQL, MsSQL, Tibero

Cloud | Infrastructure
AWS, Azure, Git, Docker

Framework | Platform
Angular, ASP.NET Core, Flutter

WORK EXPERIENCE

KO&CLO, INC.
Seoul, South Korea
2026.05 - Present

Senior Software Engineer

Key Responsibilities

- Designed and automated product sales, inventory, ordering, settlement, and store operation workflows as a unified retail management system.
- Designed and implemented a layered software architecture separating the domain, API, data, and deployment layers.
- Designed and implemented AI agent-based execution of system queries, controls, and automation tasks.

Tech Stack Python, FastAPI, Vue.js, AI Native Engineering

KOKOMO SOLUTIONS, INC.
Chicago, IL, United States
2024.02 - 2026.04

Full Stack Software Engineer

Key Responsibilities

- Designed and implemented scalable backend systems using ASP.NET Core MVC.
- Developed Angular-based front-end features including kiosks, chat services, and analytics dashboards.
- Monitored load across the entire system.
- Designed, built, and managed databases.

Tech Stack TypeScript, Angular, C#, .NET, AWS, Azure

Data Platform & Analytics Systems

- Designed and implemented end-to-end data flows from ingestion and analysis to storage and reporting.
- Built cloud data pipelines for data collection, processing, and analysis.
- Migrated the data analytics environment from the Azure platform to AWS.

Performance & Database Engineering

- Built a multi-tenant environment through database sharding, strengthening performance and security.
- Improved application performance by 30%+ through query tuning and DDL optimization (e.g., partitioning).
- Implemented database monitoring features for performance management.

WORK EXPERIENCE

TMAXGROUP
Seongnam, South Korea
2022.01 - 2024.02

Database Engineer (RDBMS Engine Development)

Designed and developed the Optimizer module on the RDBMS engine team.

Tech Stack C, C++, SQL, PL/SQL, Tibero

Engine Development

- Designed and implemented database statistics collection modules.
- Maintained and improved query parsing logic.

Query Optimization & Plan Management

- Implemented SQL Tuning Advisor and SQL Plan Management (SPM).
- Optimized scan operations (full, range, unique, skip scan, etc.).
- Implemented logic to optimize join plans.

Client Support & Performance Tuning

- Provided SQL tuning support to enterprise clients including banks.
- Analyzed execution plans and resolved performance bottlenecks.
- Optimized stored procedures and indexing strategies.

Legacy Code Modernization

- Migrated C-based legacy components to C++.

AIWORKX
Seoul, South Korea
2021.08 - 2021.12

AI Engineer

AI Vision Software Development

- Implemented AI vision solutions based on image segmentation and annotation algorithms.
- Developed edge device AI software using object detection algorithms such as YOLO.
- Regularly researched and presented AI vision papers to evaluate optimal algorithms.

Tech Stack Python, OpenCV, YOLO

EDUCATION

HANYANG UNIVERSITY
Seoul, South Korea

Bachelor of Science in Information Systems

Minor: Computer Science

- Total GPA: 4.18 / 4.5
- Major GPA: 4.32 / 4.5
